TAPES AND ADHESIVES

Europair's high-quality silver-coated Polyethylene cloth tape has been developed especially for use in the air conditioning industry. Because of its pliable texture. Duct tape can be easily applied on irregular or curved sections to seal openings in air ducts. Duct Tape uses a durable, high tack adhesive which makes it simple to apply under almost all climatic conditions. Available in rolls of 50 metres in a width of 50mm. Other widths available on request. Europair's high quality aluminium foil tape is designed for sealing seams of foil faced insulation, as well as for use on Duct Board Systems. Provides an excellent vapour barrier. Available in rolls of 50 metres in a width of 50mm. Other widths available on request. (Product No. C442).

ADHESIVES

In order to assure that the insulation will not be pulled away from itself, mechanical fastening (Weldpins or Gripnails) are recommended jointly with Adhesives. The most efficient installation of insulation requires firm adhesion to metal - eliminating all air pockets between metal and insulation. This is accomplished by means of Adhesives.

HARDCAST SEALING AND JACKETING SYSTEM

SPECIFICATION

Mineral impregnated, woven fibre tape and an activator adhesive as manufactured by HARDCAST INC and applied in accordance with the manufacturer's directions.

ADVANTAGES

Non-toxic, non-flammable, non-flash in wetstate, no duct pre-cleaning needed, apply on outside of duct only, adheres to damp or oily surfaces. Apply Hardcast Adhesive to Hardcast tape. When the tape is soft and pliable, it will conform to any shape or type of surface and when it dries it sets and becomes 100% airtight.

SHELF LIFE

Shelf life is unlimited provided tape is kept dry. Activator and adhesive should be thoroughly mixed before application. Hardcast sealing tape is available in a 92 metre length x 75mm width roll (Model No. DT 3100). Hardcast adhesive is available in a 3,8 litre plastic bottle (Model No. HC 20 TA).
